Mineral Resource Management 2025: Assessment, Mining and Processing

Message from the Guest Editors

Mineral resources are important materials that can be used to promote human civilization and scientific and technological progress. The scientific management of mineral resources (including their assessment, mining, and processing) is beneficial to improving their overall utilization rate, which is also conducive to reducing the environmental pollution caused by their incomplete consumption. Due to the widespread attention that the Special Issue “Mineral Resource Management 2023: Assessment, Mining and Processing” received, a second Special Issue, titled “Mineral Resource Management 2025: Assessment, Mining and Processing”, is being launched. Taking mineral resources as the research object, this Special Issue aims to collect diverse and impactful research articles, short communications, and review articles that address a wide range of topics pertinent to mineral assessment, mining, and processing. Research may discuss metallic minerals, nonmetallic minerals, coal, and various other mineral species, and any submissions related to these topics will be welcomed.

About the Journal

Message from the Editor-in-Chief

Responsible prosperity is underpinned by sustained access to resources. *Resources*, publishes excellent science and scholarship which transforms understanding, practices and policies for conserving all natural resources—from water, land and air; to plant and animal biodiversity; to minerals and energy and their interconnection across scales. Significantly, we invite high quality submissions from natural and social sciences.

Build impact from your research by submitting to *Resources*, an open-access journal connecting you with data, insights, ideas and evidence needed to shape a better world.

Editor-in-Chief

Prof. Dr. Benjamin McLellan

Graduate School of Energy Science, Kyoto University, Yoshida-honmachi, Sakyo-ku, Kyoto 606-8501, Japan

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), GeoRef, PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Sciences) / CiteScore - Q1
(Nature and Landscape Conservation)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 24.6 days after submission; acceptance to publication is undertaken in 4.6 days (median values for papers published in this journal in the first half of 2025).
