

Special Issue

Resource Provision of the Sustainable Development under Global Shocks

Message from the Guest Editors

Sustainable development is a central concept for global growth in the foreseeable future. Such growth, on the one hand, requires the provision of significant resources, including financial, technological, social, and natural resources. On the other hand, it should provide stability of the global economy for various markets as well as for any unforeseen environmental, political, and economic shocks. To face these challenges, we need to strengthen our knowledge of sustainable development modeling for unstable environments. This Special Issue aims to collect original research or review articles on the influence of various shocks on the stability and sustainability of global, national, and sectoral economic growth, including social, political, economic and technological aspects. We are also looking for studies modeling the long-term influence of short-term shocks on the deployment of sustainable development principles, forecasts of natural resources supply and demand, and other issues related to the achievement of sustainable goals in volatile environments.

About the Journal

Message from the Editor-in-Chief

Responsible prosperity is underpinned by sustained access to resources. *Resources*, publishes excellent science and scholarship which transforms understanding, practices and policies for conserving all natural resources—from water, land and air; to plant and animal biodiversity; to minerals and energy and their interconnection across scales. Significantly, we invite high quality submissions from natural and social sciences.

Build impact from your research by submitting to *Resources*, an open-access journal connecting you with data, insights, ideas and evidence needed to shape a better world.

Editor-in-Chief

Prof. Dr. Benjamin McLellan

Graduate School of Energy Science, Kyoto University, Yoshida-honmachi, Sakyo-ku, Kyoto 606-8501, Japan

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), GeoRef, PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Sciences) / CiteScore - Q1
(Nature and Landscape Conservation)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 24.6 days after submission; acceptance to publication is undertaken in 4.6 days (median values for papers published in this journal in the first half of 2025).
