

Special Issue

Advances in Mining Technology: The Digital Mine

Message from the Guest Editor

The ongoing need to deliver improved safety, productivity, and environmental benefits in the mining industry presents an open challenge, as well as a powerful incentive, to develop new and improved solutions. Critical to the success of this initiative is the ability to identify approaches that led to high-value processes across the entire mining value chain to improve resource quality and mining productivity, increase personnel safety, and achieve effective environmental stewardship. This Special Issue invites new contributions in mining sensing, automation and knowledge management advances, with a special emphasis on digitally-enabled technologies towards a fully digital mining ecosystem. Submission scopes can include:

- Early technology development—sensors, systems and software
- Case studies of digital technology in mining contexts
- Related applications and success in analogous domains
- Industry-focused developments and applications
- Technology roadmaps and future directions

About the Journal

Message from the Editor-in-Chief

Responsible prosperity is underpinned by sustained access to resources. *Resources*, publishes excellent science and scholarship which transforms understanding, practices and policies for conserving all natural resources—from water, land and air; to plant and animal biodiversity; to minerals and energy and their interconnection across scales. Significantly, we invite high quality submissions from natural and social sciences.

Build impact from your research by submitting to *Resources*, an open-access journal connecting you with data, insights, ideas and evidence needed to shape a better world.

Editor-in-Chief

Prof. Dr. Benjamin McLellan

Graduate School of Energy Science, Kyoto University, Yoshida-honmachi, Sakyo-ku, Kyoto 606-8501, Japan

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), GeoRef, PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Sciences) / CiteScore - Q1
(Nature and Landscape Conservation)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 24.6 days after submission; acceptance to publication is undertaken in 4.6 days (median values for papers published in this journal in the first half of 2025).
