Resource Recovery from Waste for Agriculture, Landscaping and Aquaculture

Message from the Guest Editors

With increasing attention to a circular economy, resource recovery and reuse (RRR) holds a prominent position in Sustainable Development Goals, inevitably linking the challenges of food security, waste management, health and sanitation. We are looking for papers that take the business side of RRR seriously, and present either feasibility studies or the analysis of existing businesses covering not only technical options but in particular the institutional set-up, revenue models for cost recovery, and the enabling environment. Given the vast range of RRR options, we like to limit the scope to food waste from agro-industrial and domestic sources, including the management of manure and human excreta at scale, for reuse in agriculture, forestry, landscaping and aquaculture, or for energy generation. We prefer manuscripts on case studies from low-income countries or which present content that can be applied there.

About the Journal

Message from the Editor-in-Chief

Responsible prosperity is underpinned by sustained access to resources. *Resources*, publishes excellent science and scholarship which transforms understanding, practices and policies for conserving all natural resources—from water, land and air; to plant and animal biodiversity; to minerals and energy and their interconnection across scales. Significantly, we invite high quality submissions from natural and social sciences.

Build impact from your research by submitting to *Resources*, an open-access journal connecting you with data, insights, ideas and evidence needed to shape a better world.

Editor-in-Chief

Prof. Dr. Benjamin McLellan

Graduate School of Energy Science, Kyoto University, Yoshida-honmachi, Sakyo-ku, Kyoto 606-8501, Japan

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), GeoRef, PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Sciences) / CiteScore - Q1
(Nature and Landscape Conservation)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 24.6 days after submission; acceptance to publication is undertaken in 4.6 days (median values for papers published in this journal in the first half of 2025).
