

Special Issue

Natural Resources Policy and Economics for Sustainable Development: Theory and Application

Message from the Guest Editor

More than ever, the need to manage natural resources in a way that can adequately address the needs of current generations, while maintaining their capacity to provide for future generations, has become apparent. Sustainable development requires integrated approaches that address environmental, economic, technological, institutional, and social issues in an inter- and intra-disciplinary approach. The aim of this Special Issue is to provide a ground for scientific publications of theoretical and empirical analyses on the topic of integrated sustainable management of natural resources, which address technology, institutional, societal, economic and environmental concerns. The goal is to bridge economic and policy areas of resource management for sustainable development through high-profile publications, to be used and referenced in academic and policy networks. The Special Issue welcomes scientific articles that adopt a multidisciplinary approach to the integrated assessment and management approaches to natural resources, over time and space. Studies linked to Sustainable Development Goals 6, 7, 9, 13, 14 and 16 are particularly welcomed.

About the Journal

Message from the Editor-in-Chief

Responsible prosperity is underpinned by sustained access to resources. *Resources*, publishes excellent science and scholarship which transforms understanding, practices and policies for conserving all natural resources—from water, land and air; to plant and animal biodiversity; to minerals and energy and their interconnection across scales. Significantly, we invite high quality submissions from natural and social sciences.

Build impact from your research by submitting to *Resources*, an open-access journal connecting you with data, insights, ideas and evidence needed to shape a better world.

Editor-in-Chief

Prof. Dr. Benjamin McLellan

Graduate School of Energy Science, Kyoto University, Yoshida-honmachi, Sakyo-ku, Kyoto 606-8501, Japan

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), GeoRef, PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Sciences) / CiteScore - Q1
(Nature and Landscape Conservation)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 24.6 days after submission; acceptance to publication is undertaken in 4.6 days (median values for papers published in this journal in the first half of 2025).
