

Special Issue

Underutilised Resources in Urban Environments

Message from the Guest Editor

This Special Issue focuses on materials that occur in urban environments or are strongly influenced by urban activities, and which today are underutilised. Materials are addresses under the lens of their potential valorisation, thus fostering implementation of more circular economies. This includes for example solid material streams (e.g., urban biowaste, food waste, other organic materials such as horse manure, construction and demolition waste, used furniture), specific waste water flows, urban mining, landfill mining. Technological progress in valorisation pathways for specific materials, including novel or significantly improved processes, and progress in management procedures are relevant in this context. Studies reporting on synergies between sectors or individual entities are particularly welcome. Studies addressing underutilised resources in the urban–rural context are also of high interest. Welcome to submit your manuscript at:

About the Journal

Message from the Editor-in-Chief

Responsible prosperity is underpinned by sustained access to resources. *Resources*, publishes excellent science and scholarship which transforms understanding, practices and policies for conserving all natural resources—from water, land and air; to plant and animal biodiversity; to minerals and energy and their interconnection across scales. Significantly, we invite high quality submissions from natural and social sciences.

Build impact from your research by submitting to *Resources*, an open-access journal connecting you with data, insights, ideas and evidence needed to shape a better world.

Editor-in-Chief

Prof. Dr. Benjamin McLellan

Graduate School of Energy Science, Kyoto University, Yoshida-honmachi, Sakyo-ku, Kyoto 606-8501, Japan

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), GeoRef, PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Sciences) / CiteScore - Q1 (Nature and Landscape Conservation)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 26.1 days after submission; acceptance to publication is undertaken in 4.4 days (median values for papers published in this journal in the second half of 2024).
