

Special Issue

Advances in Biomass Energy Resources to Produce Valuable Chemicals

Message from the Guest Editors

The current Special Issue focuses on aspects including but not limited to pyrolysis, gasification, combustion, and fermentation to extract useful chemicals from biomass as a potential candidate for bioenergy generation. We specifically invite papers on process optimization techniques, including embedded biorefinery approaches through machine learning, as well as life cycle assessment and technoeconomic pathways to explore market potential and development strategies. The key research topics in the Special Issue include but are not limited to: (1) Thermochemical conversion technologies to produce biochemical and biobased products; (2) Integrated biorefinery approaches including machine learning for advance biochemicals; (3) Kinetic modeling and value chain analysis; (4) Biofuel characterization; (5) Life cycle assessment of a product; (6) Experimental approaches including Py-GCMS, HPLC, XRD, and NMR results; (7) Technoeconomic and market potential analysis on advance biobased materials.

Guest Editors

Dr. Muhammad Sajjad Ahmad

Prof. Dr. Ali Elkamel

Dr. Hesham Alhumade

About the Journal

Message from the Editor-in-Chief

Responsible prosperity is underpinned by sustained access to resources. *Resources*, publishes excellent science and scholarship which transforms understanding, practices and policies for conserving all natural resources—from water, land and air; to plant and animal biodiversity; to minerals and energy and their interconnection across scales. Significantly, we invite high quality submissions from natural and social sciences.

Build impact from your research by submitting to *Resources*, an open-access journal connecting you with data, insights, ideas and evidence needed to shape a better world.

Editor-in-Chief

Prof. Dr. Benjamin McLellan

Graduate School of Energy Science, Kyoto University, Yoshida-honmachi, Sakyo-ku, Kyoto 606-8501, Japan

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), GEOBASE, GeoRef, PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Sciences) / CiteScore - Q1
(Nature and Landscape Conservation)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 23.3 days after submission; acceptance to publication is undertaken in 4.5 days (median values for papers published in this journal in the second half of 2025).
