submissions:

31 December 2024

Message from the Guest Editor

Dear Colleagues,

DeFi has evolved from a largely insular system solely for agents that want to be exposed to crypto risk returns to a system that is now looking at the financing of real assets. However, given the recent spectacular failure of FTX and the prosecution of Binance, corporate entities are reticent to use DeFi. Corporates are aware of the potential benefits but are nervous about the risks and the fact that established risk management models do not exist. The objective of this Special Issue would be to identify the best practice in DeFi risk management, both applied and theoretical. A range of authors covering this area have been identified. I suggest that it would be of interest to readers of the journal as it comes under the heading of risk management with digital assets.

Message from the Editor-in-Chief

Risks is published in Open Access format – research articles, reviews and other content are released on the internet immediately after acceptance. Specifically, *Risks* welcomes contributions that

- contribute with insight, outlook, understanding and overview, no matter how simple they are;
- show creativity in pedagogical tricks and techniques;
- help the transfer of theoretical research to public and private application;
- show responsibility for societal impact.

The scientific community and the general public have unlimited free access to the content as soon as it is published.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High visibility: indexed within **Scopus**, **ESCI (Web of Science)**, **EconLit**, **EconBiz**, **RePEc**, and **other databases**.

Journal Rank: CiteScore - Q1 (*Economics, Econometrics and Finance (miscellaneous)*)
