

Special Issue

Climate Risks: Business Scenarios and Financial Implications

Message from the Guest Editors

This Special Issue is devoted to the dissemination of research on the modeling and management of climate risks in business. The most influential reporting standards at the global level, namely the IFRS Sustainability Disclosure Standards and the European Sustainability Reporting Standards, have included climate-related risks as a prominent topic of corporate sustainability disclosure. First, companies should identify whether they are subject to climate-related physical risks or transition risks. Second, companies should describe the resilience of their strategy and business models in relation to climate change. Finally, companies should evaluate and disclose the anticipated financial effects from material physical and transition risks, specifically for future cash flows, expenses and liabilities, and assets at risk. The Special Issue will include high-quality, original research papers discussing theoretical modeling and applied solutions for tackling climate-related risks, with a focus on economic and business impacts.

Guest Editors

Dr. Voicu-Dan Dragomir
Dr. Irena Jindřichovská
Prof. Dr. Madalina Dumitru

About the Journal

Message from the Editor-in-Chief

Risks is published in an open access format; research articles, reviews, and other content are released on the internet immediately after acceptance. Specifically, *Risks* welcomes submissions that (a) contribute with insight, outlook, understanding, and overview; (b) show creativity in terms of pedagogical methods and techniques; (c) help the transfer of theoretical and applied research into applications in the public and private domains; and (d) show responsibility for the impact on society. The scientific and the general public have unlimited free access to the content as soon as it is published.

Editor-in-Chief

Prof. Dr. Steven Haberman
