

## Special Issue

# Mathematical Methods Applied in Pricing and Investment Problems

### Message from the Guest Editors

Many financial and insurance products are based on risk factors, and are not directly traded. The pricing of these products is sometimes linked to optimal investment in financial and insurance markets. One such example of this is from Jevtić, Kwak, and Pirvu (2022) who developed a continuous time model for the optimal investment and pricing of mortality-linked instruments. In this Special Issue, we are aiming to collect high-quality research papers focusing on the mathematical modelling and methodology of pricing non-tradable risks, and optimal investment in financial and insurance markets. You are invited to submit your research on continuous time stochastic models and methods for pricing non-tradable risks, and stochastic optimal control problems in finance and insurance, modelling optimal investment.

---

### Guest Editors

Dr. Traian A Pirvu

Department of Mathematics and Statistics, McMaster University, 1280 Main Street West, Hamilton, ON L8S 4K1, Canada

Dr. Petar Jevtic

School of Mathematical and Statistical Sciences, Arizona State University, Tempe, AZ 85287-1804, USA

---

### Deadline for manuscript submissions

30 November 2025

## About the Journal

### Message from the Editor-in-Chief

*Risks* is published in an open access format; research articles, reviews, and other content are released on the internet immediately after acceptance. Specifically, *Risks* welcomes submissions that (a) contribute with insight, outlook, understanding, and overview; (b) show creativity in terms of pedagogical methods and techniques; (c) help the transfer of theoretical and applied research into applications in the public and private domains; and (d) show responsibility for the impact on society. The scientific and the general public have unlimited free access to the content as soon as it is published.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High visibility:

indexed within Scopus, ESCI (Web of Science), EconLit, EconBiz, RePEc, and other databases.

#### Journal Rank:

CiteScore - Q1 (Economics, Econometrics and Finance (miscellaneous))
