

# Special Issue

## Cyber Risk and Security

### Message from the Guest Editors

Research on cyber risks and security is by nature multi-disciplinary and involves researchers from data analytics, economics, finance, forensic science, information systems, IT, management science, and mathematics. The journal *Risks* offers an ideal platform to gather forefront research from different fields on the complex subject of cyber risk and security. This Special Issue aims at publishing high-quality papers focused on quantitative analysis and management on this topic. Our ambition is to offer a discussion of the state-of-the-art and introduce new theoretical or/and practical developments in this field. We welcome papers related to, but not limited to, the following topics (in alphabetic order):

---

### Guest Editors

Dr. Michel Dacorogna

Prime Re Solutions, 6340 Baar, Switzerland

Prof. Marie Kratz

ESSEC Business School, CREAR Risk Research Center, Paris, France

---

### Deadline for manuscript submissions

## About the Journal

### Message from the Editor-in-Chief

*Risks* is published in an open access format; research articles, reviews, and other content are released on the internet immediately after acceptance. Specifically, *Risks* welcomes submissions that (a) contribute with insight, outlook, understanding, and overview; (b) show creativity in terms of pedagogical methods and techniques; (c) help the transfer of theoretical and applied research into applications in the public and private domains; and (d) show responsibility for the impact on society. The scientific and the general public have unlimited free access to the content as soon as it is published.
