

Special Issue

Cryptocurrency Pricing and Trading

Message from the Guest Editors

This Special issue features original research focused on the evolving landscape of cryptocurrency pricing and trading. This encompasses topics from the implications of AI and technological advancements on trading strategies and market behavior to new developments and innovations within cryptocurrency markets. Here is the list of **topic areas**:

- Empirical analysis of cryptocurrency price determinants;
- Trading volume and its impact on cryptocurrency markets;
- Algorithmic trading strategies in cryptocurrency markets;
- Market sentiment analysis and its effect on cryptocurrency pricing;
- Regulatory impact on cryptocurrency trading and valuation;
- Cryptocurrency market efficiency and speculation;
- Risk assessment and management in cryptocurrency investments;
- Comparative analysis of crypto and traditional assets in terms of pricing and trading;
- Innovations in cryptocurrency trading platforms and instruments.

Inquiries: Questions about submission guidelines, topic suitability, or other related matters can be sent to Dr. Tiago Gonçalves (tiago@iseg.ulisboa.pt).

About the Journal

Message from the Editor-in-Chief

Risks is published in an open access format; research articles, reviews, and other content are released on the internet immediately after acceptance. Specifically, *Risks* welcomes submissions that (a) contribute with insight, outlook, understanding, and overview; (b) show creativity in terms of pedagogical methods and techniques; (c) help the transfer of theoretical and applied research into applications in the public and private domains; and (d) show responsibility for the impact on society. The scientific and the general public have unlimited free access to the content as soon as it is published.

Editor-in-Chief
