

Special Issue

Financial Risk Management in SMEs 2022

Message from the Guest Editor

The management of financial risk in enterprises is a necessity, especially today, during the COVID-19 pandemic and armed conflicts that destroy the economy around the world. It manifests itself in the implementation of appropriate risk management principles in the company, or a selected policy or strategy for managing a company. Today, managers of entities classified as SMEs should select and adapt such financial risk management tools in an enterprise to avoid the risk of losing financial liquidity, reduce credit risk, the risk of lowering financial results, the risk of reducing revenues, and increase the possibility for further development of the enterprise. Considering the above, this Special Issue looks for outstanding research and development results, case studies, and review papers in topics that include but are not limited to the following:

- Financial risk management;
- Risk models;
- Risk measures;
- Risk analysis;
- Risk management in multi-entity organizations;
- The COVID-19 pandemic and financial risk in SMEs;
- War in Europe and the financial risk of SME functioning.

About the Journal

Message from the Editor-in-Chief

Risks is published in an open access format; research articles, reviews, and other content are released on the internet immediately after acceptance. Specifically, *Risks* welcomes submissions that (a) contribute with insight, outlook, understanding, and overview; (b) show creativity in terms of pedagogical methods and techniques; (c) help the transfer of theoretical and applied research into applications in the public and private domains; and (d) show responsibility for the impact on society. The scientific and the general public have unlimited free access to the content as soon as it is published.

Editor-in-Chief

Prof. Dr. Steven Haberman

Faculty of Actuarial Science and Insurance, Bayes Business School,
City St George's, University of London, 106 Bunhill Row, London EC1Y
