

Special Issue

Frontiers of Interdisciplinary Research on Financial and Insurance Risk Management

Message from the Guest Editors

The stability and sustainability of Financial Services and the major players therein is a necessary condition for the macroeconomic growth of any country. Be it Basel (banking) or Solvency (insurance), the regulations constantly evolve in order to reflect real-world changes. One major innovation in the regulatory regimes, which is an aftermath of the recent financial crisis, is the notion of enterprise risk management (ERM). Remarkably, today, ERM is viewed by the public authorities as a key framework to deal with risks. ERM is quite different from its predecessors, in that it calls for managing various risks simultaneously at the enterprise level and employing a unified multifaceted framework. Speaking of academia, ERM, which effortlessly crosses the boundaries of a number of distinct scholarly disciplines, invites a holistic and interdisciplinary approach to exploring risk management. With this Special Issue, we aim to share instances of successful interdisciplinary research that all focus on the problems of financial and insurance risk management. Both theoretical and empirical research contributions are welcome.

About the Journal

Message from the Editor-in-Chief

Risks is published in an open access format; research articles, reviews, and other content are released on the internet immediately after acceptance. Specifically, *Risks* welcomes submissions that (a) contribute with insight, outlook, understanding, and overview; (b) show creativity in terms of pedagogical methods and techniques; (c) help the transfer of theoretical and applied research into applications in the public and private domains; and (d) show responsibility for the impact on society. The scientific and the general public have unlimited free access to the content as soon as it is published.

Editor-in-Chief

Prof. Dr. Steven Haberman

Faculty of Actuarial Science and Insurance, Bayes Business School,
City St George's, University of London, 106 Bunhill Row, London EC1Y
