

Special Issue

Machine Learning in Finance, Insurance and Risk Management

Message from the Guest Editor

In recent years, machine learning has seen tremendous successes in many areas. In insurance and finance, additional difficulties due to the inherently dynamic and complex environment, small data, and the need for a precise understanding of the risks of applied algorithms pose enormous challenges to research and practice. This Special Issue collects some of the latest developments with a focus on applications and their possible risks. Code for the used algorithms will be made available.

Guest Editor

Prof. Dr. Thorsten Schmidt

About the Journal

Message from the Editor-in-Chief

Risks is published in an open access format; research articles, reviews, and other content are released on the internet immediately after acceptance. Specifically, *Risks* welcomes submissions that (a) contribute with insight, outlook, understanding, and overview; (b) show creativity in terms of pedagogical methods and techniques; (c) help the transfer of theoretical and applied research into applications in the public and private domains; and (d) show responsibility for the impact on society. The scientific and the general public have unlimited free access to the content as soon as it is published.

Editor-in-Chief

Prof. Dr. Steven Haberman

Faculty of Actuarial Science and Insurance, Bayes Business School,
City St George's, University of London, 106 Bunhill Row, London EC1Y
