

## Special Issue

# Innovations in Quantitative Finance and Risk Analysis

### Message from the Guest Editor

The aim of research in quantitative finance and risk analysis is to enhance the understanding and application of mathematical, statistical and computational techniques to solve complex problems in financial markets. This includes developing models for pricing financial instruments, forecasting market movements, managing financial risks and optimizing investment portfolios. The focus is on quantitatively assessing risks and returns, devising strategies to mitigate potential losses and identifying opportunities for gains in various financial contexts. This research seeks to provide theoretical foundations and practical tools for investors, financial institutions and policymakers to make informed decisions, improve financial stability and contribute to the overall efficiency and resilience of financial systems.

### Guest Editor

Prof. Dr. Yang Lu

College of Economics, Shenzhen University, 3688 Nanhai Avenue,  
Nanshan district, Shenzhen 518060, Guangdong, China

### Deadline for manuscript submissions

closed (30 May 2025)

## About the Journal

### Message from the Editor-in-Chief

*Risks* is published in an open access format; research articles, reviews, and other content are released on the internet immediately after acceptance. Specifically, *Risks* welcomes submissions that (a) contribute with insight, outlook, understanding, and overview; (b) show creativity in terms of pedagogical methods and techniques; (c) help the transfer of theoretical and applied research into applications in the public and private domains; and (d) show responsibility for the impact on society. The scientific and the general public have unlimited free access to the content as soon as it is published.
