

Special Issue

New Perspectives in Actuarial Risk Management

Message from the Guest Editors

The key themes of “UNISActuarial SCHOOL 2018” will be new perspectives in actuarial risk management. In light of these considerations, the risks need to be identified and managed under professional guidance, underpinned by a toolbox of real-world models and bespoke solutions. Successful companies rely on actuarial foundations to understand longer risk exposures in order to effectively and efficiently manage those risks. In this context, this Special Issue focuses on the social sciences applied to the main topics related to the life insurance field, by means a quantitative approach. Therefore, it solicits high-quality papers for a wide range of actuarial topics:

- Insurance
- Insurance products and contractual innovations
- Stochastic modelling of extremal events in insurance and finance
- Aggregation of risk measures
- Longevity risk
- Solvency analysis
- Retirement planning
- Risk management
- Pensions, etc.

About the Journal

Message from the Editor-in-Chief

Risks is published in an open access format; research articles, reviews, and other content are released on the internet immediately after acceptance. Specifically, *Risks* welcomes submissions that (a) contribute with insight, outlook, understanding, and overview; (b) show creativity in terms of pedagogical methods and techniques; (c) help the transfer of theoretical and applied research into applications in the public and private domains; and (d) show responsibility for the impact on society. The scientific and the general public have unlimited free access to the content as soon as it is published.

Editor-in-Chief

Prof. Dr. Steven Haberman

Faculty of Actuarial Science and Insurance, Bayes Business School,
City St George's, University of London, 106 Bunhill Row, London EC1Y
