

Special Issue

Risks in Finance, Economy and Business on the Horizon in the 2030s

Message from the Guest Editors

- Many countries' economies and finances are still recovering from the COVID-19 pandemic. Complications from armed conflicts and the energy crisis have also emerged. These developments are well-documented in numerous high-impact academic journals.
- The editors of this Special Issue see an opportunity for researchers to address the topic "Risks in Finance, Economy and Business on the Horizon in the 2030s." This topic is broad, considering current debates on artificial intelligence, state alliances' changes, the Russia-Ukraine war, the Green Deal's abandonment, new military policies, global powers' trade policies, market reconfiguration, and tariff wars.
- Therefore, the aim of this Special Issue is to present comprehensive studies and original contributions that analyze the aforementioned risks associated with new developments and scenarios in the sphere of economy and business, manifested at all levels: micro-, macro-, and the global economy.

About the Journal

Message from the Editor-in-Chief

Risks is published in an open access format; research articles, reviews, and other content are released on the internet immediately after acceptance. Specifically, *Risks* welcomes submissions that (a) contribute with insight, outlook, understanding, and overview; (b) show creativity in terms of pedagogical methods and techniques; (c) help the transfer of theoretical and applied research into applications in the public and private domains; and (d) show responsibility for the impact on society. The scientific and the general public have unlimited free access to the content as soon as it is published.

Editor-in-Chief

Prof. Dr. Steven Haberman

Faculty of Actuarial Science and Insurance, Bayes Business School,
City St George's, University of London, 106 Bunhill Row, London EC1Y
8TZ, UK
