Special Issue

Artificial Intelligence Risk Management

Message from the Guest Editor

The growth of artificial intelligence requires researchers to develop risk management models that balance opportunities with risks. This Special Issue welcomes studies that propose methods and applications showing how to measure, manage and mitigate the risks associated with artificial intelligence. We aim to make artificial intelligence responsible, safe and trustworthy.

About the Journal

Message from the Editor-in-Chief

Risks is published in an open access format; research articles, reviews, and other content are released on the internet immediately after acceptance. Specifically, *Risks* welcomes submissions that (a) contribute with insight, outlook, understanding, and overview; (b) show creativity in terms of pedagogical methods and techniques; (c) help the transfer of theoretical and applied research into applications in the public and private domains; and (d) show responsibility for the impact on society. The scientific and the general public have unlimited free access to the content as soon as it is published.

Editor-in-Chief

Prof. Dr. Steven Haberman
Faculty of Actuarial Science and Insurance, Bayes Business School, City St George's, University of London, 106 Bunhill Row, London EC1Y 8TZ, UK

Author Benefits

Open Access:
free for readers, with article processing charges (APC) paid by authors or their institutions.
