# **Special Issue**

# Pension Design, Modelling and Risk Management

## Message from the Guest Editors

The ability to identify, quantify, forecast and manage the economic, demographic and financial risks that challenge the long-term objectives of public and private retirement income schemes is of paramount importance for creating and managing financially sustainable and intra- and intergenerationally fair public and private pension schemes. This Special Issue of *Risks* is devoted to high-quality papers that move the state-of-the-art forward with innovative theoretical, practical and policy-oriented developments in risk management.

## **About the Journal**

## Message from the Editor-in-Chief

Risks is published in an open access format; research articles, reviews, and other content are released on the internet immediately after acceptance. Specifically, Risks welcomes submissions that (a) contribute with insight, outlook, understanding, and overview; (b) show creativity in terms of pedagogical methods and techniques; (c) help the transfer of theoretical and applied research into applications in the public and private domains; and (d) show responsibility for the impact on society. The scientific and the general public have unlimited free access to the content as soon as it is published.

#### Editor-in-Chief

#### Prof. Dr. Steven Haberman

Faculty of Actuarial Science and Insurance, Bayes Business School, City St George's, University of London, 106 Bunhill Row, London EC1Y 8TZ. UK

#### **Author Benefits**
