

## Special Issue

# Risk Analysis in Insurance and Pensions

### Message from the Guest Editor

With climate change entering our doors and the nature of insurance markets changing, the study of risk in insurance has become ever more challenging. In addition, changes in mortality, migration, and working patterns all contribute to putting stress on individuals, institutions, and governments, with consequences in all areas of insurance and pensions. The study of risk in insurance is, in its essence, multidisciplinary. In this Special Issue, we invite researchers to share their work, either theoretical or empirical, on risk analysis in insurance and pensions, presenting different perspectives and addressing questions in different areas, including actuarial and statistical methodology; the financial economics of insurance and pensions; social insurance; decentralized insurance; and sustainable insurance.

## About the Journal

### Message from the Editor-in-Chief

*Risks* is published in Open Access format – research articles, reviews and other content are released on the internet immediately after acceptance. Specifically, *Risks* welcomes contributions that

- contribute with insight, outlook, understanding and overview, no matter how simple they are;
- show creativity in pedagogical tricks and techniques;
- help the transfer of theoretical research to public and private application;
- show responsibility for societal impact.

The scientific community and the general public have unlimited free access to the content as soon as it is published.
