

Special Issue

Risk Analysis in Insurance and Pensions

Message from the Guest Editor

With climate change entering our doors and the nature of insurance markets changing, the study of risk in insurance has become ever more challenging. In addition, changes in mortality, migration, and working patterns all contribute to putting stress on individuals, institutions, and governments, with consequences in all areas of insurance and pensions. The study of risk in insurance is, in its essence, multidisciplinary. In this Special Issue, we invite researchers to share their work, either theoretical or empirical, on risk analysis in insurance and pensions, presenting different perspectives and addressing questions in different areas, including actuarial and statistical methodology; the financial economics of insurance and pensions; social insurance; decentralized insurance; and sustainable insurance.

About the Journal

Message from the Editor-in-Chief

Risks is published in an open access format; research articles, reviews, and other content are released on the internet immediately after acceptance. Specifically, *Risks* welcomes submissions that (a) contribute with insight, outlook, understanding, and overview; (b) show creativity in terms of pedagogical methods and techniques; (c) help the transfer of theoretical and applied research into applications in the public and private domains; and (d) show responsibility for the impact on society. The scientific and the general public have unlimited free access to the content as soon as it is published.

Editor-in-Chief

Prof. Dr. Steven Haberman
