Financial Risks and Regulation

Message from the Guest Editor

The regulation of financial risks is a topic of active debate among academics, industry practitioners, and policymakers. In the aftermath of the 2007–2009 Great Recession, there was a coordinated effort by regulatory bodies around the world to strengthen oversight and regulation of banks, as evidenced by the passage of the Dodd–Frank Act and the ratification of the Basel III accords. However, the current U.S. government is aggressively moving towards relaxing bank oversight and regulation, thereby suggesting that the debate on regulation remains unresolved. The world is also witnessing climatic events of increasing severity stemming from climate change in recent years, and this is leading to large and catastrophic losses of lives and property. Only a portion of these catastrophic losses are insured, but even limited exposure to losses could lead (and has led) insurers to face insolvency. Consequently, the regulation of insurers is also an issue of very high importance, as evidenced by the ratification of the Solvency II regulation for insurers along with the Basel III accords.

About the Journal

Message from the Editor-in-Chief

Risks is published in an open access format; research articles, reviews, and other content are released on the internet immediately after acceptance. Specifically, *Risks* welcomes submissions that (a) contribute with insight, outlook, understanding, and overview; (b) show creativity in terms of pedagogical methods and techniques; (c) help the transfer of theoretical and applied research into applications in the public and private domains; and (d) show responsibility for the impact on society. The scientific and the general public have unlimited free access to the content as soon as it is published.

Editor-in-Chief

Prof. Dr. Steven Haberman

Faculty of Actuarial Science and Insurance, Bayes Business School,
City St George's, University of London, 106 Bunhill Row, London EC1Y
