

Special Issue

The Future of Parametric Insurance and Innovations in Risk Trading

Message from the Guest Editor

I am pleased to invite you to join our Special Issue on “The Future of Parametric Insurance and Innovations in Risk Trading”. The insurance industry needs to be prepared for this highly volatile future by offering a reliable infrastructure that can quickly and objectively settle claims around even the most unforeseeable events. In the past few years, we have seen major advances in innovation for the (re-)insurance industry and this Special Issue invites you to contribute on this topic. Research areas and topics of interest may include (but are not limited to) the following: Innovation in the insurance industry, Alternative Risk Transfer and the future of risk trading, parametric insurance markets, the interconnection between financial and (re-)insurance markets, as well as systemic risks and catastrophe risk management solutions. Similar topics as related to the future of the insurance industry are also welcome.

I look forward to receiving your contributions!

Guest Editor

About the Journal

Message from the Editor-in-Chief

Risks is published in an open access format; research articles, reviews, and other content are released on the internet immediately after acceptance. Specifically, *Risks* welcomes submissions that (a) contribute with insight, outlook, understanding, and overview; (b) show creativity in terms of pedagogical methods and techniques; (c) help the transfer of theoretical and applied research into applications in the public and private domains; and (d) show responsibility for the impact on society. The scientific and the general public have unlimited free access to the content as soon as it is published.

Editor-in-Chief

Prof. Dr. Steven Haberman
