

Special Issue

Quantitative Risk Management in Agribusiness

Message from the Guest Editors

In its production processes, agriculture faces the most risks compared to other sectors of the economy. The management of these risks is becoming increasingly more efficient due to the proliferation of advanced information and forecasting systems and precision agricultural technologies; however, production processes continue to be exposed to increasingly extreme environmental impacts. This Special Issue collects papers that address the risks along agricultural value chains and any of their aspects.

About the Journal

Message from the Editor-in-Chief

Risks is published in an open access format; research articles, reviews, and other content are released on the internet immediately after acceptance. Specifically, *Risks* welcomes submissions that (a) contribute with insight, outlook, understanding, and overview; (b) show creativity in terms of pedagogical methods and techniques; (c) help the transfer of theoretical and applied research into applications in the public and private domains; and (d) show responsibility for the impact on society. The scientific and the general public have unlimited free access to the content as soon as it is published.

Editor-in-Chief

Prof. Dr. Steven Haberman

Faculty of Actuarial Science and Insurance, Bayes Business School,
City St George's, University of London, 106 Bunhill Row, London EC1Y
8TZ, UK
