Autonomous Mobile Robots in Open World

Message from the Guest Editors

Dear Colleagues,

We are pleased to invite you to submit your papers to this Special Issue of *Robotics*, "Autonomous Mobile Robots in Open World". This Special Issue aims to introduce the latest research progress in the field of mobile robotics, especially in autonomous contexts. We encourage submissions of conceptual and empirical papers focused robotics in the open world, especially applied to the mapping of open world, perception, decision making and control of autonomous robots. Different types of approaches related to this field are welcome.

Prof. Dr. Zdzisław Kowalczuk
Dr. Mariusz Domżalski
Dr. Michał Czubenko

Message from the Editor-in-Chief

It is my great pleasure to welcome you to our open access journal, *Robotics*, which is dedicated to both the foundations of artificial intelligence, bio-mechanics and mechatronics, and the real-world applications of robotic perception, cognition and actions. The 21st century is the robotics century and intelligent robots will change our lifestyle forever. Let us work together toward the realization of intelligent robots step by step.

It is great fun to create intelligent robots and imagine their practical applications. *Robotics* is now ready to serve you in the long journey towards such a goal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed in the Emerging Sources Citation Index (ESCI - Web of Science), Scopus (from Vol. 6), nspec (IET) and DBLP Computer Science Bibliography.

Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 24.5 days after submission; acceptance to publication is undertaken in 3.9 days (median values for papers published in this journal in the first half of 2019).
