### Message from the Guest Editors

Dear Colleagues,

To celebrate the achievements of women in the robotics research area, this Special Issue, entitled "Women in Robotics ", will feature women and men co-authors, comprising leading experts in robotics, along with colleagues and junior researchers. We will also greatly appreciate the contributions of any other experts (no gender limitation) on topics broadly involving robots and robotics, to be included in this Special Issue being put together to celebrate women in the field. We hope that this Special Issue will further encourage and promote the scientific contributions of women who are researchers in this field. Papers in all areas of robotics, including but not limited to social robotics, robot acceptance, developmental robotics, robotics design, optimization, control, learning, and experimentation, among many others, are welcome.

## Message from the Editor-in-Chief

It is my great pleasure to welcome you to our open access journal, *Robotics*, which is dedicated to both the foundations of artificial intelligence, bio-mechanics and mechatronics, and the real-world applications of robotic perception, cognition and actions. The 21st century is the robotics century and intelligent robots will change our lifestyle forever. Let us work together toward the realization of intelligent robots step by step.

It is great fun to create intelligent robots and imagine their practical applications. *Robotics* is now ready to serve you in the long journey towards such a goal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, ESCI (Web of Science), dblp, Inspec, and other databases.

**Journal Rank:** JCR - Q2 (*Robotics*) / CiteScore - Q1 (Mechanical Engineering)
