closed (31 August 2017)

Message from the Guest Editors

Dear Colleagues,

Agriculture is one of the oldest and most important industries human civilization has ever established. Continuing advancement in agricultural mechanization and automation technologies has led the agriculture into an era of robotic farming era. The objective of this Special Issue is to promote a deeper understanding of major conceptual and technical challenges and facilitate spreading of recent breakthroughs in agricultural robotics. Topics of interest include (but are not limited to):

Sensing technologies for situation awareness in agricultural applications

Control strategies for robot manipulation in agricultural applications

Automatic guidance of robotic vehicle in agriculture sites

UASs/drones in agriculture

Robotics for crop production

Robotics for greenhouse and vertical farming systems

Machine learning and artificial intelligence in agriculture

Message from the Editor-in-Chief

It is my great pleasure to welcome you to our open access journal, *Robotics*, which is dedicated to both the foundations of artificial intelligence, bio-mechanics and mechatronics, and the real-world applications of robotic perception, cognition and actions. The 21st century is the robotics century and intelligent robots will change our lifestyle forever. Let us work together toward the realization of intelligent robots step by step.

It is great fun to create intelligent robots and imagine their practical applications. *Robotics* is now ready to serve you in the long journey towards such a goal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed in the Emerging Sources Citation Index (ESCI - Web of Science), **Scopus** (from Vol. 6), nspec (IET) and DBLP Computer Science Bibliography.

Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 27 days after submission; acceptance to publication is undertaken in 5.9 days (median values for papers published in this journal in the second half of 2018).
