

## Special Issue

# Smart Agriculture with AI and Robotics

### Message from the Guest Editor

The integration of robotics and artificial intelligence (AI) into agriculture is revolutionizing the way we grow, manage, and harvest food. This Special Issue focuses on cutting-edge advances in intelligent robotic systems designed for smart agriculture, with emphasis on autonomy, precision, and sustainability. Topics of interest include agricultural mobile robots and drones, AI-driven perception and decision-making, task planning for field operations, crop monitoring and yield estimation, and human-robot collaboration in unstructured environments. Particular focus is given to real-world deployment of robotic solutions that address agricultural challenges such as labor shortages, resource efficiency, and climate adaptation. We welcome original research articles, reviews, and case studies that demonstrate the potential of robotics and AI in transforming agriculture into a more productive, data-driven, and environmentally sustainable sector.

### Guest Editor

Dr. Antonio Valente

1. School of Sciences and Technology-Engineering Department (UTAD), 5000-801 Vila Real, Portugal
2. INESC TEC, Campus da Faculdade de Engenharia da Universidade do Porto, Rua Dr. Roberto Frias, 4200-465 Porto, Portugal

### Deadline for manuscript submissions

28 February 2026

## About the Journal

### Message from the Editor-in-Chief

It is my great pleasure to welcome you to our open access journal, *Robotics*, which is dedicated to both the foundations of artificial intelligence, bio-mechanics and mechatronics, and the real-world applications of robotic perception, cognition and actions. The 21st century is the robotics century and intelligent robots will change our lifestyle forever. Let us work together toward the realization of intelligent robots step by step. It is great fun to create intelligent robots and imagine their practical applications. *Robotics* is now ready to serve you in the long journey towards such a goal.

---

### Editor-in-Chief

Prof. Dr. Marco Ceccarelli

LARM2: Laboratory of Robot Mechatronics, Department of Industrial Engineering, University of Rome Tor Vergata, Via del Politecnico 1, 00133 Roma, Italy

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), dblp, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Robotics) / CiteScore - Q1 (Control and Optimization)
