# **Special Issue**

# Editorial Board Members' Collection Series: "Soft Robotics"

### Message from the Guest Editors

This series will focus on mechanics, control, design, conceptualization, fabrication, and applications of soft robotic systems. Papers especially addressing the theoretical, experimental, practical, and technological aspects of soft robotics and extending concepts and methodologies, from classical robotics to soft robotics, will be highly suitable for this series. Potential topics include but are not limited to:

- Materials (e.g., smart, responsive, and structural) for soft robotics:
- Application of the programmable matter concept to soft robotics;
- Soft smart materials amenable to additive manufacturing, with programmable mechanical (stiffness, damping and similar) and electrical (resistance, capacitance) properties;
- Novel fabrication techniques such as additive manufacturing for soft robotics;
- Actuation, locomotion, manipulation, and sensing concepts for soft robotics;
- Soft or compliant mechanisms for soft robotics.

Dr. KC Aw

### **About the Journal**

### Message from the Editor-in-Chief

It is my great pleasure to welcome you to our open access journal, *Robotics*, which is dedicated to both the foundations of artificial intelligence, bio-mechanics and mechatronics, and the real-world applications of robotic perception, cognition and actions. The 21st century is the robotics century and intelligent robots will change our lifestyle forever. Let us work together toward the realization of intelligent robots step by step. It is great fun to create intelligent robots and imagine their practical applications. *Robotics* is now ready to serve you in the long journey towards such a goal.

### Editor-in-Chief

Prof. Dr. Marco Ceccarelli

LARM2: Laboratory of Robot Mechatronics, Department of Industrial Engineering, University of Rome Tor Vergata, Via del Politecnico 1, 00133 Roma, Italy

### **Author Benefits**

### **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, ESCI (Web of Science), dblp, Inspec, and other databases.

### **Journal Rank:**

JCR - Q2 (Robotics) / CiteScore - Q1 (Control and Optimization)
