

Special Issue

Agricultural Robots

Message from the Guest Editors

Many research activities in the field of agricultural robotics started more than 20 years ago, but most of them were discontinued due to the high costs of implementation and the unsuccessful results. Recently due to the decrease in the cost of sensors, computing equipment and many other robotic related technologies, many researchers have started new projects and proposed new applications of robots in agriculture. Moreover nowadays the rising costs of labor and new safety regulations make the adoption of robots in agriculture more convenient. This special issue welcomes submissions concerning new theories and methods and innovative applications of robotics in agriculture. We particularly encourage papers with thorough experimental evaluation.

About the Journal

Message from the Editor-in-Chief

It is my great pleasure to welcome you to our open access journal, *Robotics*, which is dedicated to both the foundations of artificial intelligence, bio-mechanics and mechatronics, and the real-world applications of robotic perception, cognition and actions. The 21st century is the robotics century and intelligent robots will change our lifestyle forever. Let us work together toward the realization of intelligent robots step by step.

It is great fun to create intelligent robots and imagine their practical applications. *Robotics* is now ready to serve you in the long journey towards such a goal.

Editor-in-Chief

Prof. Dr. Marco Ceccarelli

LARM2: Laboratory of Robot Mechatronics, Department of Industrial Engineering, University of Rome Tor Vergata, Via del Politecnico 1, 00133 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), dblp, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Robotics) / CiteScore - Q1 (Control and Optimization)
