

Special Issue

Milk and Dairy Products

Message from the Guest Editor

The Special Issue aims to collect the latest research progress in understanding the role of milk and dairy products. This is a call for relevant research publications to reflect the most recent progress and/or to highlight relevant points of scientific emphasis, including future directions. You are encouraged to submit one or more manuscripts to this Special Issue; research articles, communications, and scientific reviews are welcome. Relevant topics include the following: (1) microbial analysis related to dairy products; (2) biological functions and screening of probiotics; (3) control methods and technology of milk and dairy products; (4) milk and dairy products quality; (5) milk and dairy product safety; (6) developing dairy products with functions that fortify human health; (7) milk allergy; (8) effect of processing technologies as strategies for quality maintenance; (9) chemistry, structure, and characteristics of milk of different species/breeds.

About the Journal

Message from the Editor-in-Chief

Ruminants (ISSN 2673-933X) is an international open access journal. It publishes original research articles, reviews, and communications that offer substantial new insight into any field of study that involves ruminants, including cattle, all domesticated and wild bovines, goats, sheep, giraffes, deer, gazelles, and antelopes.

Editor-in-Chief

Prof. Dr. Brian J. Leury

Faculty of Veterinary and Agricultural Sciences, University of
Melbourne, Melbourne, VIC 3010, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), Scopus, EBSCO, and other databases.

Journal Rank:

CiteScore - Q2 (Veterinary (miscellaneous))
