

## Special Issue

# Trends on Ruminants' Husbandry, Breeding, Product Quality and Environmental Footprint

### Message from the Guest Editors

We invite original research papers and comprehensive review articles on recent advances in the ruminant sector, including (but not limited to) husbandry and breeding strategies; genomic, transcriptomic, proteomic, and epigenomic research; conservation of genetic diversity; product quality; animal monitoring; identification of behavioral traits to improve animal welfare; adaptation and mitigation strategies toward climate change and water scarcity; and circular-economy-related issues.
