Special Issue

Navigating the Complexity of Natural Hazards and Disasters: Research, Preparedness and Mitigation

Message from the Guest Editor

Natural hazards and disasters pose an ever-present threat to communities worldwide. These phenomena, ranging from earthquakes and hurricanes to floods and wildfires, have profound impacts on human life, infrastructure, and ecosystems. As disaster specialists, we recognize the urgency of enhancing our understanding and preparedness to mitigate these threats effectively. This Special Issue will delve into the multifaceted nature of natural hazards and disasters by addressing the following critical questions that drive current research and practice:

- Understanding hazard dynamics
- Climate vulnerability and risk assessment
- Impact analysis
- Mitigation strategies
- Preparedness and response
- Policy and governance

We invite contributions that explore these themes through research articles, review articles, and short communications. Your insights will contribute to a deeper understanding of natural hazards and the development of robust strategies to protect our communities and environment. Transport and Road Safety (TARS), University of New South Wales, Old Main Building (K15), Sydney, NSW 2052, Australia

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), SafetyLit, and other databases.

Journal Rank:

CiteScore - Q2 (Safety Research)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 37.2 days after submission; acceptance to publication is undertaken in 5.7 days (median values for papers published in this journal in the first half of 2025).
