Special Issue

Safety Design and Perception-Based Safety

Message from the Guest Editors

Emerging areas in safety can be informed by the human aspects and are the central focus of this special issue. Fundamentals of perception, human factors and ergonomics will be highlighted in the context of safety, environment and health. Corporate and commercial applications in safety, environment and health incorporate a variety of physical, life and management sciences. Human modelling associated with measures of people (anthropometry), human characteristics in computing and artificial intelligence (anthropomorphic) and our real and perceived effects on environment (anthropogenic) are of interest. Manuscript emphasizing aspects outlined here are welcomed and encouraged. Others will also be considered if within the perception – based safety theme. The expected schedule for special issue is outlined below: Original manuscript submission by: Monday, December 31
First reviews returned to authors: Friday, February 1
First revision expected by: Friday, April 5
