

Special Issue

Process Safety

Message from the Guest Editors

Process safety is an well-known technology and science for preventing accidental chemical releases in chemical process, which may cause fires, explosions, over-pressures, over-temperatures, and corrosion, which can have a serious effect on the plant and environment. It includes many important issues, such as risk identification and management, personal protective equipment, prevention of fire and explosion, management of change, mechanical integrity, process safety technology, emergency management and stakeholder outreach, reactive chemical research, etc. We welcome every topic related to process safety to be submitted to this Special Issue.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Raphael Grzebieta
Transport and Road Safety (TARS), University of New South Wales, Old
Main Building (K15), Sydney, NSW 2052, Australia

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), SafetyLit,
and other databases.

Journal Rank:

CiteScore - Q2 (Safety Research)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 37.2 days after
submission; acceptance to publication is undertaken in 5.7
days (median values for papers published in this journal in
the first half of 2025).
