

## Special Issue

# Safety—Practitioners' Perspectives

### Message from the Guest Editors

Contemporary engineering is building ever more complex systems, especially through the integration of cyber and physical parts into cyber-physical systems (CPS) in domains such as transportation, manufacturing, healthcare, and power generation. New hazards and increased risks of CPS during operations are known and under the intense scrutiny of researchers. However, this research is seldom actively related to the engineering organisations that ensure that the design of said CPS is suitable for safe operations. This Special Issue invites papers that bridge this gap between research and engineering practice, for instance, (empirical) studies:

- Of engineering organisations and practice as related to the safe engineering of CPS.
- Relating novel methods for ensuring safety to CPS engineering processes or standards.
- Clarifying limitations on safety practice brought on by the sociotechnical context of engineers producing CPS.
- Safety management (assurance) in engineering organisations.

Prof.

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Raphael Grzebieta  
Transport and Road Safety (TARS), University of New South Wales, Old  
Main Building (K15), Sydney, NSW 2052, Australia

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, ESCI (Web of Science), SafetyLit,  
and other databases.

##### Journal Rank:

CiteScore - Q2 (Safety Research)

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 37.2 days after  
submission; acceptance to publication is undertaken in 5.7  
days (median values for papers published in this journal in  
the first half of 2025).
