# Aviation Safety—Accident Investigation, Analysis and Prevention

#### Message from the Guest Editors

Although commercial air travel is one of the safest modes of transportation, general aviation, comprised mainly of non-revenue, light aircraft (60-fold higher fatal accident rate. Additionally, accidents for the latter impose a financial burden on the USA of up to \$4.64 billion annually. While a modest reduction in the general aviation fatal accident rate has been witnessed over the last decade, a wide chasm still exists between this sector of aviation and air carriers. How then to improve general aviation safety? In the past, implementing changes towards improving general aviation safety have been reactive (to an accident). In contrast, more recent emphasis, certainly with air carriers, has been placed on a proactive gathering of in-flight data (e.g., via flight operations quality assurance, , etc.) towards averting future mishaps. [...]

### **About the Journal**

#### Message from the Editor-in-Chief

#### **Editor-in-Chief**

Prof. Dr. Raphael Grzebieta

Transport and Road Safety (TARS), University of New South Wales, Old Main Building (K15), Sydney, NSW 2052, Australia

#### **Author Benefits**

#### **High Visibility:**

indexed within Scopus, ESCI (Web of Science), SafetyLit, and other databases.

#### **Journal Rank:**

CiteScore - Q2 (Safety Research)

#### **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 37.2 days after submission; acceptance to publication is undertaken in 5.7 days (median values for papers published in this journal in the first half of 2025).
