

Special Issue

Information Security

Message from the Guest Editors

Information is a critical to effective and timely decision making. We must ensure that that information is of good quality and treated as an asset. It is also important to ensure that information is secure and available when it is required for an intended audience for an intended purpose. Effective information security is crucial to trusted analytics, intelligence, decision-making, and automation. Traditional and fragmented approaches to information security often fall short. A business resilience, risk-driven information security-by-design approach is required to secure digital information assets in digitally enabled ecosystems. This Special Issue hopes to investigate contemporary information security concepts, design challenges, practices, technologies, and applications in various areas.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Raphael Grzebieta
Transport and Road Safety (TARS), University of New South Wales, Old
Main Building (K15), Sydney, NSW 2052, Australia

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), SafetyLit,
and other databases.

Journal Rank:

CiteScore - Q2 (Safety Research)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 37.2 days after
submission; acceptance to publication is undertaken in 5.7
days (median values for papers published in this journal in
the first half of 2025).
