

Special Issue

Injury Biomechanics 2020

Message from the Guest Editor

This Special Issue "Injury Biomechanics" will focus on either applied, experimental, or theoretical studies dedicated to the identification and definition of injury mechanisms, the quantification of biomechanical responses, the determination of impact tolerance levels, and the development and use of injury assessment devices and techniques for evaluating injury prevention systems. Emphasis is on expanding our knowledge of musculoskeletal biomechanics related to injury prevention and human health. Researchers can submit papers dealing with any aspect related to the biomechanics of injury.
