Management of Manmade Disasters

Message from the Guest Editor

Manmade disasters, whether caused by natural or manmade hazards, can cause severe damage to individuals, communities, economies, supply chains, and the environment. Moreover, they may trigger secondary disasters, aggravating initial impacts. We would like this edition to offer a targeted set of both scientific and practical activities for implementation at national and local levels and to support training and capacity building and to raise awareness of the risks and impacts of manmade disasters. Potential topics include but are not limited to: hazardous release, explosion/fire, transportation accident, energy/power/utility failure, fuel/resource shortage, air/water pollution, contamination, acts of terrorism: explosions, chemical, biological, manmade disasters, preparedness, response, mitigation, vulnerability, capacity, risk safety, risk assessment for environmental emergencies.

Guest Editor

Dr. Chalaris Michail

Hephaestus Laboratory, School of Chemistry, Faculty of Sciences,
Democritus University of Thrace, 65404 Kavala, Greece

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Raphael Grzebieta
Transport and Road Safety (TARS), University of New South Wales, Old
Main Building (K15), Sydney, NSW 2052, Australia

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), SafetyLit,
and other databases.

Journal Rank:

CiteScore - Q2 (Safety Research)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 37.2 days after
submission; acceptance to publication is undertaken in 5.7
days (median values for papers published in this journal in
the first half of 2025).
