

Special Issue

Safety Performance Assessment and Management in Construction

Message from the Guest Editor

The is inviting submissions for a Special Issue of Safety on safety performance assessment and management in construction, a subject that requires special attention from scholars and practitioners. Each year, hundreds of thousands of construction workers are seriously injured, and thousands lose their lives. Because of these tragic events, the lives of countless family members are changed forever. Therefore, there is a dire need to provide innovative methods and insights to effectively assess and manage safety performance in construction projects. Research featured in this Special Issue will reflect and explain how upper management and safety personnel within a construction firm can prepare, monitor, and respond to safety risks in a practical manner during the design and construction phases. Accordingly, this Special Issue aims to provide practical, data-driven insights into how we can assess and manage the safety of construction projects. For further reading, please follow the link to the Special Issue Website at:

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Raphael Grzebieta
Transport and Road Safety (TARS), University of New South Wales, Old
Main Building (K15), Sydney, NSW 2052, Australia

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), SafetyLit,
and other databases.

Journal Rank:

CiteScore - Q2 (Safety Research)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 37.2 days after
submission; acceptance to publication is undertaken in 5.7
days (median values for papers published in this journal in
the first half of 2025).
