

Special Issue

All-Terrain (ATVs, Quad Bikes) and Off-Highway (ROVs, UTVs, SSVs, LSVs, LUVs, MUVs, XUVs) Vehicle Safety

Message from the Guest Editor

The use of ATV (Quad Bikes) and off-highway vehicles, such as Side by Side Vehicles (SSV) and Utility Terrain Vehicles (UTVs), both recreationally (ROVs) and in the workplace, continues to be a major contributor to fatal and serious injuries throughout the world. Despite significant attention, little progress has been made in reducing these incidents or their severity, and indeed, trauma related to the use of these vehicles appears to be increasing. In some countries, such as Sweden and parts of the USA, such vehicles are permitted to travel on public roads, further exacerbating the injury problem. This Special Issue will focus on all aspects of safety associated with these vehicle types. Researchers can submit papers dealing with any aspect related to the safety of these vehicles.

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), SafetyLit,
and other databases.

Journal Rank:

CiteScore - Q2 (Safety Research)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 37.2 days after
submission; acceptance to publication is undertaken in 5.7
days (median values for papers published in this journal in
the first half of 2025).
