Message from the Guest Editors

Dear Colleagues,

The MATBIM2019 conference will focus on three main themes that are currently hot areas in the field of food and bioproduct packaging materials: (i) mass transfer and food and bioproduct/material interactions, (ii) new trends toward environmentally friendly materials, and (iii) new materials through nanotechnology routes. Within these three main themes, several topics will be discussed during the conference, including transfer phenomena and toxicological/safety assessment, new materials from biomass and downgauging strategies, bottom-up/top-down approaches, and hybrid materials, just to mention a few. *Sci* will publish a selection of papers related to the meeting in the form of regular articles as well as critical reviews and perspectives. Your contribution is very welcome!

Dr. Stefano Farris
