

Special Issue

Feature Papers— Multidisciplinary Sciences 2024

Message from the Guest Editors

We are once again excited to announce the fourth edition of our annual Feature Papers Collection here in *Sci*. As we continue to bridge gaps between diverse scientific disciplines, we are particularly delighted to share with you that *Sci* has recently achieved a CiteScore of 3.1 from SCOPUS. You may have also noticed that we have updated *Sci*'s aims and scope ([see details](#)) in an effort to acquire a pending Journal Impact Factor. Thank you for your continued support! For our 2024 Special Issue, we encourage and seek quality contributions from your area of expertise that address potential implications for the environment and society. We invite you as an authority in your field of research to contribute a keynote publication that aims to present scientific interdisciplinary problem-solving. These "Feature Papers" will be collected as part of the annual overview of activities in the areas relevant to *Sci* and will be published in book format after the Special Issue has been closed. We look forward to receiving your submissions that align with the scope of *Sci*'s diverse scientific activities.
