Alternative Mechanisms of Induction of CNS Diseases

Message from the Guest Editor

The failure of clinical trials in Alzheimer's disease and Parkinson's disease highlights the need to find alternative mechanisms of induction of these diseases. It is clear that beta-amyloid does not cause Alzheimer's disease and alpha-synuclein may not cause Parkinson's disease. In addition, newly discovered endocannabinoid-like molecules may provide new clues about the causes of autism, multiple sclerosis, and other CNS diseases.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Claus Jacob
Division of Bioorganic Chemistry, School of Pharmacy, Saarland
University, D-66123 Saarbruecken, Germany

Author Benefits

High Visibility:

indexed within ESCI (Web of Science), Scopus, and other
databases.

Journal Rank:

CiteScore - Q1 (Multidisciplinary)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 36.6 days after
submission; acceptance to publication is undertaken in 6.8
days (median values for papers published in this journal in
the first half of 2025).
