

## Special Issue

# Climate Change Impacts on Mangrove Ecosystems

### Message from the Guest Editor

Situated at the land–sea interface, mangrove ecosystems are well-suited to be sentinels for climate change. Mangrove environments are physically, geologically and ecologically dynamic and it is primarily these forces, within the confines of changing environmental and climatic conditions, that sculpt mangrove ecosystems over time. Human impacts on mangroves, including climate change, have received much attention of late especially because mangrove deforestation is occurring at a rapid rate. Despite high rates of destruction and degradation, mangroves still play key roles in ameliorating coastal erosion, fostering coastal stability and assisting in human sustainability.

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Claus Jacob  
Division of Bioorganic Chemistry, School of Pharmacy, Saarland  
University, D-66123 Saarbruecken, Germany

---

#### Author Benefits

##### High Visibility:

indexed within ESCI (Web of Science), Scopus, and other  
databases.

##### Journal Rank:

CiteScore - Q1 (Multidisciplinary)

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 36.6 days after  
submission; acceptance to publication is undertaken in 6.8  
days (median values for papers published in this journal in  
the first half of 2025).
