Special Issue

Dual Disorder Patients: Clinical and Therapeutical Aspects - Volume Two

Message from the Guest Editors

We are pleased to invite you to contribute to the *Sci* Special Issue "Dual Disorder Patients: Clinical and Therapeutical Aspects - Volume Two". We welcome the submission of both original research and critical review articles for possible publication in the issue. Topics of interest for this issue include:

- Predictors of substance use patterns and transition to addiction in relation to coexisting psychiatric disorders;
- Effectiveness of anticraving agents in specific dual diagnosis clinical pictures;
- Evidence of persistent psychiatric disorders induced by addictive substance use;
- Improvements in early and late attrition of dual diagnosis patients enrolled in addiction treatment programs;
- Therapies targeting psychotic symptoms of cannabis users and aggressive behavior of cannabis using patients;
- Opiate agonists and antagonists: effects of dual diagnosis and related behaviors, in a categorial or dimensional perspective.
