

Special Issue

Feature Papers— Multidisciplinary Sciences 2022

Message from the Guest Editors

We are pleased to announce our third Special Issue of the annual series of Feature Papers Collection. We intend to focus again this year on interdisciplinarity. We aim to develop *Sci* to become more inclusive in terms of content and audiences. *Sci* aims at bridging the traditional gaps between different scientific disciplines and encourages collaborations to tackle the main challenges facing us today, such as energy, food, water, climate, and health. Furthermore, we would like to introduce the “what’s it about?” initiative in which authors provide a concise summary of their contribution rendered towards non-specialists and the more general public. Therefore, in 2022, our Special Issue aims to publish original articles and reviews on topics considered by our editors as being actual and highly significant to their field, environment, and society. We invite you as an authority in your field of research to contribute a keynote publication aimed especially though not exclusively at interdisciplinary scientific problem solving.
