## Feature Papers 2021 Editors Collection

### Message from the Guest Editors

We are pleased to announce our second Special Issue of the annual series of Feature Papers Editors Collection. We intend to focus this year on interdisciplinarity. The ongoing COVID-19 pandemic has illustrated gaps between different scientific disciplines and scientific practices. One way of bridging such gaps is by collaborating across disciplines to tackle the main challenges facing us today, such as energy, food, water, climate, and health. Therefore, in 2021, our Special Issue aims to publish original articles and reviews on the interdisciplinary topics considered by our editors as being actual and highly significant. We, therefore, invite you as an authority in your field of research to contribute a keynote publication aimed at scientific interdisciplinary problem solving. These “Feature Papers” will be collected as part of the annual overview of activities in the areas relevant to *Sci* and will be published in book format after the Special Issue has been closed.
